Objective

Full-stack developer specializing in React.js, Next.js and React Native with hands-on experience building high-performance web and mobile apps. Proven ability to design and ship production-ready features, integrate secure payment flows, and scale products to 10,000+ users. Comfortable working in fast-paced startup environments from architecture and backend integrations to UI/UX and DevOps automation

Technical Skills

- Frontend: React.js, Next.js, React Native, HTML, CSS, TypeScript
- Backend: Node.js, Python, FastAPI, Express.js
- Database: PostgreSQL, MySQL, MongoDB, Firebase, AWS services
- Tools & DevOps: GitHub, Vercel, Figma, Postman, Docker

Experience

React Native Developer/Full Stack Developer
Decode Tech (dcodestech.com)

April 2025 – Present (6 months)
Gujarat, India

- Developing cross-platform mobile applications using React Native for the product “Chopda”
- Built custom software solutions and internal tools tailored to company requirements
- Designed and developed responsive website UI using modern design principles
- Collaborated with product team to deliver seamless user experiences across mobile and web platforms

Full Stack Developer
JUNIGADI (junigadi.com)

February 2025 – April 2025 (3 months)
Gujarat, India

- Architected and developed complete full-stack application with both web and mobile interfaces
- Set up and integrated ICICI payment gateway for secure transaction processing
- Built advanced car searching system with intelligent filtering and recommendation engine
- Integrated Google Sheets API for automated data management and real-time reporting

Head of Club & Community Leader
CodeLab

June 2024 – Present
Ganpat University

- Lead team of 400+ developers building real-world web and mobile applications
- Organized workshops on React.js, Next.js, React Native, and full-stack development
- Mentored junior members in both frontend and backend development with career guidance
- Established collaborative learning environment fostering innovation and practical skill development

Projects

Scoopy – Movie Review Platform (React Native)

- Built comprehensive movie review and opinion-sharing platform for YouTuber collaboration (equity holder)
- Scaled application to 10,000+ active users with real-time review system and social features
- Developed both web application (React.js) and mobile app (React Native) for cross-platform reach
- Implemented advanced caching and optimization strategies for high-traffic performance

DailyYou – AI-Powered Health Platform (React Native & Dashboard Next.js)

[dailyYou.in](https://dailyyou.in)

- Developed comprehensive health platform unifying nutrition tracking, medical records, and fitness guidance
- Built mobile app with photo-based meal tracking powered by AI nutritional analysis
- Created two-sided marketplace connecting patients with healthcare providers and wellness professionals
- Implemented clinic ERP integration with shareable digital health cards and centralized medical records

Student.io – Campus Social Network (React Native)

- Developed full-stack social media platform with web and mobile applications (React Native)
- Implemented real-time chat, event management, and campus networking features using Firebase
- Successfully scaled to 50+ active users from Ganpat University with responsive design
- Integrated push notifications and real-time updates for enhanced user engagement

Gujjascript - Programming Language & IDE (Next.js)

codebhai.vyasvishal.in

- Created custom programming language with JavaScript-like syntax and full-featured online IDE
- Implemented complete compiler architecture using Next.js with real-time code execution
- Built comprehensive development environment with syntax highlighting, error handling, and debugging

FormLab - Advanced Form Builder (Next.js)

formlab.vyasvishal.in

- Built comprehensive form builder platform with Google Forms-like functionality using Next.js and TypeScript
- Implemented drag-and-drop interface with 15+ customizable field types and conditional logic
- Integrated Prisma ORM with Neon PostgreSQL for efficient data management and real-time analytics
- Developed responsive web interface with a mobile-optimised form submission experience

Education

Bachelor of Computer Applications (BCA)
Acharya Motibhai Patel Institute of Computer Studies

June 2023 – March 2026
Ganpat University, Gujarat

Achievements & Recognition

- 1st Place Winner in 5 technical events at "Udaan 2025" including Hackathon and Tech Quiz
- Solo Hackathon Champion at Ampics competition
- Social Media Influencer: Actively collaborating with multiple content creators in tech community
- Entrepreneurial Success: Co-founded and scaled Scoopy to 10,000+ users as equity stakeholder
- Community Impact: Built and led developer community with 400+ active members
- Leadership Excellence: Founded CodeLab and organized 10+ technical workshops on web and mobile development
